

Product Requirements Document (PRD)

Project: فزعة (Fazaa Store)

Version: v1.2

Date: 2025-09-15

Owner: [You/Team Name]

1. Overview

فزعة is a simple and functional web application that enables customers to choose a product value, select an installment provider (Tabby / Tamara), and decide how the first payment is handled. The system shows the calculated conversion amount, installments, and monthly payment, and allows the customer to send their request via WhatsApp.

The site is **Arabic-only**, right-to-left (RTL), and designed with a **minimal, clean UI**.

2. Goals & Objectives

- Provide a **clear, easy-to-use interface** for customers to select financing options.
 - Dynamically calculate and display **summary fields** based on user selections.
 - Offer **direct WhatsApp integration** for finalizing the request.
 - Keep the site lightweight, fast, and mobile-friendly.
 - No need for multi-language or admin content editing in this version.
-

3. Target Users

- **End Customers:** Individuals who want short-term installment-based financing with quick cash-out.
 - **Business Owner/Admin:** Needs only to maintain static site data (no admin panel required in this version).
-

4. User Stories

- As a **customer**, I want to see a hero section with a clear description of the service.
- As a **customer**, I want to select a product value from a table.
- As a **customer**, I want to choose the provider (Tabby or Tamara).

- As a **customer**, I want to specify if I will pay the first installment or deduct it from the transfer.
 - As a **customer**, I want to see a dynamic calculation of transfer amount, monthly installment, and duration.
 - As a **customer**, I want to send my request directly to **WhatsApp (+966504428580)**.
-

5. Features & Requirements

5.1 Hero Section

- Full-screen hero section with gradient background.
- Arabic project title: **فزة**.
- Short service description in Arabic.

5.2 Price List

- Static table of product values (in SAR).
- Columns:
 - Product Value (قيمة المنتج)
 - Conversion Amount (مبلغ التحويل)
 - First Payment (الدفعة الأولى)
 - Choose (اختر button)

5.3 Provider Selector

- Radio buttons:
 - Tabby (تابي)
 - Tamara (تمارا)

5.4 First Payment Option

- Toggle between:
 - Yes (نعم)
 - No, deduct from conversion amount (لا، خصمها من مبلغ التحويل)

5.5 Summary / Calculations

- Fields updated dynamically:
 - Amount to be transferred (المبلغ المطلوب تحويله)
 - Monthly installment (القسط الشهري)
 - Total installments (إجمالي الأقساط)
 - Number of months (عدد الأشهر)

5.6 Notes Section

- Transparency and clarity (الالتزام وشفافية).
- Easy and safe (سهل وآمن).
- Fast support (دعم سريع).

5.7 FAQ

- Common short Q&A in Arabic:
 - Do I need a first payment? (هل أحتاج دفعة أولى؟)
 - How many installments? (كم عدد الأقساط؟)
 - How is the transfer done? (كيف يتم التحويل؟)

5.8 WhatsApp Integration

- Contact number: **+966504428580**.
 - Button: “إرسال الطلب عبر واتساب” opens <https://wa.me/966504428580>.
 - Pre-filled message template with user selections (product value, provider, first payment choice).
-

6. Technical Architecture

6.1 Frontend

- **Framework:** Next.js (App Router)
- **UI:** React + Tailwind CSS
- **TypeScript:** for strict typing and maintainability
- **Direction:** Arabic RTL only

6.2 Data

- Price list stored as static JSON or inline array.
- No content.json / localization system (Arabic only).
- All text hardcoded in Arabic.

6.3 Backend / API

- No backend required in this phase.
 - WhatsApp link used directly for requests.
-

7. Security

- No user data stored on server.
 - No authentication needed.
 - WhatsApp is the only communication channel.
-

8. Success Metrics

- Number of WhatsApp requests sent.
 - Percentage of visitors who interact with the table and summary section.
 - Low bounce rate (landing → interaction → WhatsApp).
-

9. Deliverables

- Next.js + Tailwind project setup (RTL support enabled)
- Hero Section (Arabic title: فزعة)
- Price Table (static data)
- Provider Selector (Tabby/Tamara)
- First Payment Toggle
- Dynamic Summary Calculator
- Notes + FAQ Section (Arabic only)
- WhatsApp Integration (wa.me/966504428580) with pre-filled request message
- Deployment on Vercel
